## SUMMARY:

- 5 year work experience as developer .
- I current working in Viitorcloud.pvt as software developer .
- I have 1 year experience in core php, 3 year experience in Codeigniter,1 year working in laravel.
- I had started my journey in **infoware.pvt.ltd** as a core PHP developer. there I had to work around 1 year. it's product base company.
- then I had join to **connectionphase.pvt.ltd** company as CI developer in this company. here I am working on API development for IOS and android. this project is related to the product management like:-  
category add/update/remove same product, and show it in APP, how many sales, how much available stock, add cart, checkout product, the payment process etc.
- Then I'm joining in **viitorcloud.pvt.ltd** as a software developer. here I am working on this type of project like see below.
  1. **Event4U** - it's an event management process like invoice guest, guest comment, share, create vender and inform to the nearest event to vender, also user make a template for this and set its images dynamic and invite user and a reminder to everyone who accepts the invitation -1 year

**Technology** - web/admin/API in Codeigniter,HTML,CSS,jquery,MySQL ,android/IOS app

2. **Zwaluw** - it's a product-based big company project in that we have to work on category, product management and processes like get an inquiry to confirm the order and then prepare material according to requirement and payment management.

**Technology** - Admin/API in Codeigniter,HTML,CSS,jquery,MySQL  
,android/IOS app

3. **Mdoner** - it's a government project. managing government event's and manage the project and its status

**Technology** - web/admin in laravel,HTML,CSS,jquery,MySQL database

4. **Kibaki** - it's one type of charity portal. process - children request help, register hospital, etc and request for money and one club has decided how much amount we have to give etc

**Technology** - API in laravel, front in vuejs , HTML,CSS, jquery, MySQL

5. **Amplify** - it's a sports management project. in that project, we have register trainee and trainer and plan all training schedule with attendance management, arrange a test for sports it's food to everything calculating and give best trainee list -

**Technology** - web/admin in laravel,HTML,CSS,jquery,MySQL
