## PROJECTS

### CALLONDOC

Get an online doctor visit anytime from anywhere when you need one from CallOnDoc. There is no wait to get an online doctor appointment today. It provide features like primary care services from the comfort of your home and also provides e-prescription for minor illnesses and pre-existing conditions.

### ILIFE

ILLife is a online insurance portal for life insurance agents to brand a microsite, provide quotes in real time, and access CRM functionalities all in one place.

### TAXBOTIC

Taxbotic is a workflow management software that automates document requests and workflows for T1 clients of accounting professional.

### LABORNET

LaborNet was developed to solve this problem by being an industry centralized database that allows moving companies and drivers to search for labourers by the city, state or zip code and post jobs for labourers to find and apply for. The capability to actively search for labourers as well as post jobs truly streamline the process unlike anything else.

### DATEMYFRIEND

The DateMyFriend format was created to deliver a new approach to online dating in Australia. It introduces you to other great singles through the eyes of friends. It is focused on giving you a great platform for meeting like minded singles. Everyone on the site has been described by their friends so you know you're getting genuine reviews.

### AND MANY MORE...

- **Bella Pizza** - A pizza ordering system with paypal payment gateway.
  - **Primetime** - An event management system for Artists and Musicians.
  - **Townwall**- A website is a place to discover upcoming events and services.
  - **Marmosque** - A website will present you with your daily matches. you can ask the imam for advice, guidance or facilitation.
  - **Tallyfy** - Tallyfy is the only workflow and process management software that gives you everything you need to automate tasks, document processes, track workflows and run training in a single system.
