Project Detail

- Title: Motor Controlled Scissor Jack
- Duration: 1 Year
- Team member: 4
- Description: Jack is a mechanical device used to lift heavy loads or apply great forces. A mechanical jack employs a square thread for lifting heavy equipment.

Project Detail

- Title: Bending Machine
- Duration: 1 Year
- Team member: 4
- Description: Major work involved in making stirrups and bending of sheet metal is done by a human. Stirrups are prepared manually in small construction sites which require effort and also time for production of a few stirrups is more. This leads to slow overall progress of work or requires more labour to save time. Stirrups are square or trapezoidal shape which is used in construction of columns and beams.
