Generation of Electrical power by blad less wind mill :-

Abstract :-The purpose in this days non renewable energy sources are gone to depth of the earth,So we can ablvously energy produce by renewable energy sources.There are used blade wind mills to produce energy produces,but It's having cost, maintenance cost, running cost, friction loss etc. So by this project,we can going to generate electricity by using the blad less wind mill. It will generate electricity by help of oscillation or vibration produced due to the wind. It works on be generated by using linear generator. There will be no blades and no rotation, so friction loss will be low and it is eco friendly.

EDUCATION DETAILS

Degree/Course	Institution	University/Board	CGPA/Percentage	Year of Passing
SSC	SADHANA VIDHYALAYA	GSEB	59.33%	2014
Diploma In Electrical Engineering	C U SHAH TECHNICAL INSTITUTE OF DIPLOMA STUDIES	C U SHAH UNIVERSITY	69.30%	2018

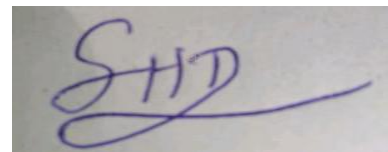

ACHIEVEMENTS

- Participate in kabaddi competition at state level
- First rank in project exhibition
- CCC Course in Computer classic of Bhavani computer Dhrangadhra

DECLARATION

I hereby declare that the above cited information is true to the best of my knowledge and belief, if given a chance, I can prove myself.

Place: Dhrangadhra
