## Programming

## Projects

Jan-April,17

### Database management

[Helping Hands](#)

This project idea was influenced from actor Akshay kumar's republic day video which was for Indian soldiers. In this project we created a database of all soldiers including army, navy, airforce and BSF. This database has all information regarding their family and income along with their personal bank details. Any one can visit the site and can donate money to them through bank details and the constraint was of 1000000 rupees for a soldier after that respective data will delete from database.

Aug-Nov,17

### Software Engineering

[Audarya](#)

This project idea was came during semester break when we threw so many things which could be use by someone but those were not use of us. So we made a website which included all ngo, old age home, orphanage list according to their needs. people can visit the site and can donate and communicate with them through information provided over there.

Aug-Nov,17

### web Technology

[Nutrition Supervision](#)

In this project we created a website which include all the nutrient content in respective food, drink, beverage, or dish. It also include diet plans and weight management plans.

## Education

### Personal Skills

2015-Now

### B.Tech in IT Engineering
