ABOUT ME

I am a perceptive and observant person who consistently strives for changing the world to a better place to reside in. Since childhood, I am a great devotee of nature, it's every small gesture gives me contentment.

After acquiring a little knowledge of this field, I perceived that integration of built form with the nature and interaction of nature with it's inhabitants makes it magnificent. I believe that architecture is not only for people, but also for the environment. It is an approach to interact with the people and the environment.
