## PROFILE

As an IT Data Analyst, my professional summary would showcase my expertise in collecting, analysing and interpreting complex data sets to identify trends, patterns, and insights that drive business decisions. With experience in data extraction, data manipulation, and data visualisation, I possess a keen eye for detail and a passion for finding solutions to complex problems. I am proficient in using various data analytics tools such as SQL, Excel, Python and Power BI, to create custom reports, dashboards, and visualisations that provide actionable insights. I also possess excellent communication and presentation skills, which enable me to effectively communicate findings to both technical and non-technical audiences.
