PROFESSIONAL EXPERIENCE

Feb 2022 – Feb 2023: S&P GLOBAL | **Data Analyst**

KEY DELIVERABLES:

- Processing and analyzing relevant Ownership data of public companies by utilizing internal & external public research sources like the company's annual reports, notifications, and regulatory filings which ultimately serves as a base for key investment decision made by the end users.
- Manage various ownership data reports and audits workflows by doing quality checks of SQL-based queries, initiating cause analysis and resolution.
- Managing research projects and analysis for various companies as a part of important decisions involved such as mergers & acquisitions, restructuring, and company linking with respect to company profiling.
- Worked on software or tools like Capital IQ, Portfolio Distribution and Grids, Macros, Forseer, Ownership Linking, Workday, Pathfinder, Celsius, and Content Tool Suite.
- Processed documents from all parts of the world, from providing ownership to the shareholders reported both individually and by the company to making portfolios for the clients and providing securitization to the positions reported in the portfolios based upon the client's requirements.
- Created various Excel documents to assist with pulling metrics data and presenting information to stakeholders for concise explanations of the best placement for needed resources.
- Assessed liquidity and market risk levels and applied a risk-based approach to oversee financial activities.
- Informed financial decisions by analyzing financial information to forecast business, industry, or economic conditions.
- Formulated knowledgeable forecasts for the business, industry, and overall economic conditions based on available financial information.
- Identified key risks and mitigating factors of potential investments such as asset types and values, legal and ownership structures, and industry segments.
- Monitored industry, technological and economic developments to stay current on potential risks.
