Data Science Masters

WORK EXPERIENCE

Hitech I Solutions LLP
Feb-2018 to till Date
Role: Senior CSR (Data Analyst)

Use the tableau and SQL (**DBeaver**) to write SQL Query and make some insightful information fetching easy way

Prepare the financial Profit and Loss report for the USA and Hong Kong clients. Where it includes tracking the Daily Revenue Forecasting **(This includes the Upcoming three-month revenue calculation and projection)**, logistics, Analytics reports **(This includes the revenue analytics and up and downs of projected revenue and achieved revenue with their reasons)**, and meeting with HK and USA management with monthly presentation. Where the prepared presentation I have to discuss with the United States and Hong Kong clients in general monthly meetings. The presentation includes the overall summary and graphs and the waterfall with the monthly revenue and expenditure

With the report need to support the HK and US clients in their work and also educate with my work and report, where my reports continuously used by their team so in case if they have any doubt regarding the same they directly contact as so somehow, it's also become support part as well.
